

Top Hat

Top Hat is a vintage inspired treble booster with modern features. All the classic sounds and much more. Drive your amp into glorious overdrive with this pedal.

Bias controls the gain of the transistor and Volume controls the output. With the Cap control you can roll off the low-end going into the circuit. Classic treble booster sounds with Cap fully up. The Transistor-toggle changes between a vintage germanium and a modern silicon transistor. Modern silicon transistor has more gain and is sharper edged. Choose the one you like or change from song to song.

Bias controls the gain of the chosen transistor

Volume controls the output

Cap controls the low end going into the circuit

Toggle switches between a germanium and a silicon transistor

True bypass

9V from an external power supply (no battery option)

Please use a good quality isolated power supply.

Handmade in Tampere, Finland
